

A NEW 500-KV TRANSMISSION LINE

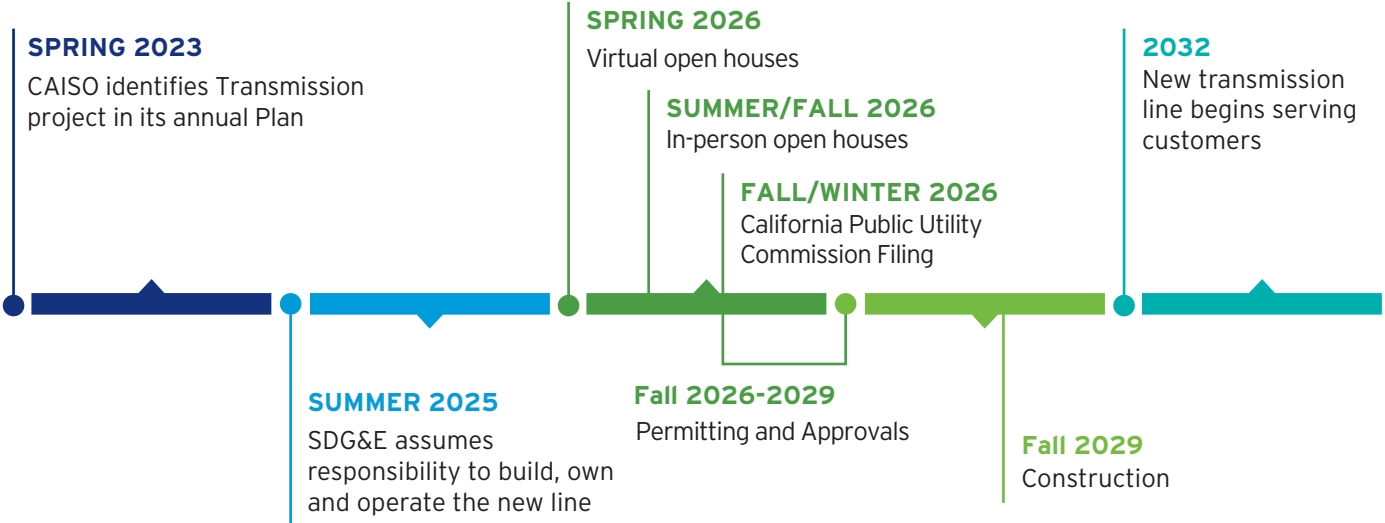

Golden Pacific Powerlink

Delivering Tomorrow's Energy

California is entering a period of unprecedented growth in electricity demand as homes, transportation, businesses, and industry increasingly rely on clean electric power.

San Diego Gas & Electric is planning Golden Pacific Powerlink, a major 500kV transmission investment that will help ensure that even as energy use rises, electricity is there where it's needed most, whether you're turning on the lights, charging a vehicle, powering a home, or running critical services.

Projected Timeline

*Estimated dates
Estimated dates*

This new line will help keep the region's power supply stable and allow the state to meet its energy goals as our energy needs continue to grow.

- Create a vital, new transmission pathway
- Enhance the region's electrical grid
- Enable greater integration of more electricity generation

Opportunities for Participation

SDG&E acquired the project and is in preliminary planning. While the project is being developed, we are committed to gathering public input to ensure the you have an opportunity to engage in the process.

Gathering

community feedback to help inform project development.

Hosting

open houses and other engagement opportunities.

Virtual Open Houses:

May 12 and 14 2026; 12 p.m. and 5:30 p.m.
All events will present the same content

In-Person Open Houses: Later in 2026

Following an environmental review and public participation process, the final route will be determined by the California Public Utilities Commission and relevant federal agencies.

SDG&E's Commitment to Safety and Reliability

With over 140 years of experience delivering energy across the region, SDG&E has a strong track record of building and operating critical infrastructure – from transmission lines to battery storage. The Golden Pacific Powerlink will benefit from this expertise, including SDG&E's award-winning wildfire safety program, which has helped prevent major utility-related wildfires for more than 17 years. Safety and reliability will guide every step of the project.
