

Eagle Soar Splash Pad Rehabilitation
Parks/Recreation Project

Project Description: Rehabilitation of existing splash pad components to restore operation, including replacement of failed subsurface fiber glass water tank with new reinforced concrete water tank which would enhance overall durability of the water storage system

Benefit: The Eagle Soar Spash Pad has been unusable since the Spring of 2025 due to failure of the existing underground fiberglass water storage tank. The project will replace this tank with a reinforced concrete tank which would restore operation to the facility.

Core Value: Healthy and Livable City

Project Status: New project. Project will begin in December of 2025
