

**PUBLIC TRAFFIC/SAFETY COMMISSION
AGENDA REPORT**

TO: Public/Traffic Safety Commission

FROM: Patrick Thomas, Director of Public Works/City Engineer

DATE: May 26, 2022

SUBJECT: Interim Striping on Ynez Road from Santiago Road to Rancho Vista Road

PREPARED BY: Erick Escobedo, Associate Engineer II
Nick Minicilli, Senior Traffic Engineer

RECOMMENDATION: That the Public/Traffic Safety Commission receive and file the report.

BACKGROUND: A pavement rehab and slurry seal project will be occurring on Ynez Road from Santiago Road to Rancho Vista Road. As part of this pavement project, City staff has redesigned the lane configuration for this section of Ynez Road. The interim striping plan will increase northbound and southbound lane capacities by utilizing the existing excess roadway width on Ynez Road. Staff anticipates the interim striping will help reduce congestion and driver frustration along Ynez Road.

Exhibit A shows the proposed striping configuration. The proposed striping design on Ynez Road will provide two northbound lanes from Mountain View Road to Rancho Vista Road and will extend the existing two southbound lanes through the intersection of Pauba Road and Ynez Road. In addition, appropriate signing, markings, and bike lane pavement legends will be implemented to enforce the adjusted striping layout.

The pavement and striping work are anticipated to occur in the summer of 2022.

This striping work is considered interim since it is unknown when the larger project that will widen Ynez Road from Rancho Tierra Vista Road to Santiago Road will occur.

FISCAL IMPACT: Installation of striping and pavement markings are to be included in the CIP Pavement Rehabilitation Program.
