

**CITY OF TEMECULA
AGENDA REPORT**

TO: City Manager/City Council

FROM: Patrick Thomas, Director of Public Works / City Engineer

DATE: October 22, 2019

SUBJECT: Establish a Fee for the Use of Electric Vehicle Charging Stations on City Property

PREPARED BY: Julie Tarrant, Principal Management Analyst
Stacey Biddle, Management Assistant - Public Works

RECOMMENDATION: That the City Council adopt a resolution entitled:

RESOLUTION NO. 19-

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY
OF TEMECULA ESTABLISHING AN ELECTRIC VEHICLE
CHARGING STATION FEE**

BACKGROUND: On December 11, 2018 City Council approved a Purchase and Installation Agreement with ChargePoint, Inc. utilizing funds awarded by the Mobile Source Air Pollution Reduction Review Committee, AB 2766 Subvention Funds, and Capital Improvement Program (CIP) Budget. Purchase of the electric vehicle charging (EVC) station equipment was completed in March 2018 and installation at three sites was completed July 15, 2019. The City now offers six dual-port EVC stations at the Civic Center Parking Garage, Temecula Park & Ride, and Sixth Street Parking Lot for use by the public.

Based on an evaluation of current City policies, approaches taken by other California cities, and operating and capital costs borne by the City, the City's Public Works Department recommends that the City Council establish a \$1.00/hour Electric Vehicle Charging Fee for all EVC stations including the Civic Center and any future sites at various City properties.

FISCAL IMPACT: Establishing usage fees allows the City to recover expenditures associated with the ownership and public use of EVC stations. Revenue generated would reimburse the City for expenditures associated with the charging stations, including electricity costs.
