

**CITY OF TEMECULA
COMMUNITY DEVELOPMENT DEPARTMENT
MEMORANDUM**

TO: Old Town Local Review Board
FROM: Luke Watson, Deputy City Manager
DATE: September 13, 2021
SUBJECT: Presentation on Parking Space Availability Signs

PREPARED BY: Patrick Thomas, Director of Public Works Department

RECOMMENDATION: Receive and file.

BACKGROUND: On August 10, 2021, the City Council received an update on parking in Old Town. The presentation included potential short-term solutions and a revised Old Town Parking Study. One of the short-term solutions discussed included the addition of digital parking space availability signs at the 6th Street and Southside/Stampede parking lots, similar to the signs currently installed at the Civic Center Parking Structure. This plan also includes digital parking signs at the north and south entrances to Old Town. The City Council gave staff direction to proceed with installation of the digital parking availability signs.

City staff is working with Parking Logix, on procurement of the digital parking availability signs. Attached to the staff report is a mockup of the proposed signs for use at the 6th Street and Southside/Stampede parking lots. Also attached is mockup of the “3-level” signs for use at the north and south ends of Old Town.
